

Welcome to your new

SELECTOR<

Here's the quick and easy way to find what you want:

- > Go to **Window or View** in the control bar at the top of your screen.
- > Pull down the menu and select **Show Bookmarks or Bookmarks, depending on your PC set-up.**
- > An alphabetical index of the contents of the SELECTOR< will appear to the left of your screen.
- > Click on the subject you want – you'll be taken straight to the right page.
- > The Bookmarks list will stay on your screen for as long as you want so it can always be handy.
- > To print any page, hold down the **Ctrl** key and type **P**.

BT Communication Products

the
ART
of communications

ISSUE 1
October 2001

Welcome to your new SELECTOR<

This SELECTOR< is produced for you to use as a handy reference to the current range of BT's communication products designed for residential, SoHo and small business customers. The SELECTOR< also contains information on products that are due to launch between October and the end of January 2002.

All the essential information you need about each product is contained in this guide, positioned in a way that makes it easy to locate and easy to read. If you have any comments on how the presentation could be improved please complete and return the Amendments and Suggestions form at the back of the guide

See at a glance what's what

At the head of each product page you'll find a clear indication of the section you're in a and series of icons which are designed to give you an instant appreciation of the key characteristics of the product.

You'll find them all illustrated overleaf with a short description of what they stand for.

After-sales service for products new and old

You'll find after-sales service information for each product at the bottom of its page. You'll also find after-sales information for older BT products as well as existing ones, all together for easy reference.

Keep up to date

All the details contained in the following pages were correct at the time of publication. For any changes that happen between now and the next issue of your guide in January, please take a regular look at the BT Inernet at: **www.bt.com**

What the icons stand for

NEW

Indicates a **NEW** addition to this issue – either one that's already available or one that's due to be launched this period.

Product available with an inductive coupler.

Product with a built-in digital answering machine.

Product with a colour printing capability.

The industry-wide logo which shows that a product works with a Caller Display service to provide information on callers.

Indicates that the product is digital using DECT (Digital Enhanced Cordless Telecommunications) technology and compatible with other handsets carrying this logo.

TER	Terracotta
TTM	Titanium

Market review

The UK market for communication products continues to grow, led by the consumer demand for analogue and digital cordless phones. BT remains the No. 1 brand in the UK and the 1st choice for the consumer.

Our commitment to deliver quality, innovation and design at value for money prices will help to maintain our brand position in the eyes of the consumer.

This has been clearly evident in our cordless range where consumer demand has led to an impressive 1 million Freestyle 70 cordless telephones being produced.

The No. 1 choice for consumers, the Freestyle 70 has become the No.1 overall telephony product since its launch in September 1999, proving that design and quality are some of the most important factors in this market.

As leaders of innovation we continue to bring to market products which enhance your lifestyle and give you the freedom and flexibility not seen previously.

Digital Cordless Phones

No.1 brand for Volume and Value.

BT On-Air Executive Plus Handset & Charger

DKGY 872082 5016351603192

Diverse 3010 Classic

Main Features

• 10 Number memory

Allows you to store up to 10 names and numbers at the touch of a couple of buttons.

• 120 Dynamic channel selection

Ensures best quality interference free reception.

• 5 Last number redial

The five most recently dialled numbers are stored and can be accessed again at the touch of a button.

• Base station and handset ringer volume control

Allows the volume to be adjusted.

• Caller Display*

Can be set to list 'All Calls' or just 'Unanswered Calls'. The numbers are stored in a 30 number Calls Log.

• Call Waiting*

When used with Caller Display you can see who is calling whilst engaged on another call, provided the number of the other caller is not withheld.

• Digital Security

Prevents calls being overheard or picked up on other cordless telephones.

• Expandability

Up to 5 extra handsets (extensions) can be registered to a single base station (6 in total per base station), without the need for additional wiring.

Additional Information

- REN = 1 for base station
- REN = 0 for handset

Either choose the pre-recorded announcement or record your own personal message that you want your callers to hear. Alternatively you can play an advisory announcement to your callers eg. 'Sorry, you can't leave a message at the moment, please call back.'

• Choice of voice quality

You can choose between 'long play' which will give you up to 15 minutes digital record time, or 'high quality' which will reduce the length of the recording time.

• Clock/alarm/calendar

The handset's clock feature allows you to set and alarm call. You can also use the telephone to ring and remind you of an important date.

• Handsfree

Allows you to hold a conversation without lifting the handset.

• LED on handset

Alerts you to an incoming call, when the line is in use and flashes to tell you when you have had new calls.

• Private playback via the handset

• Remote access

This enables you to access your answering machine from another tone dialling phone. Full remote access available.

• SMS text messaging

You can send and receive SMS* text messages.

• Switchboard compatible

Can be connected to most switchboards which support tone signalling and timed break recall, enabling use at home or in an office environment.

• Walk & Talk feature

Allows two Executive handsets to communicate when they are away from the base station (range between handsets must be a maximum of 300 metres).

• Talktime**/standby

Up to 10 hours talktime and up to 150 hours standby.

• Up to 15 minutes digital recording

All messages are recorded digitally allowing consistent quality reproduction and fast re-setting.

** A separate quarterly fee is payable*

***When batteries are fully charged*

Synergy 2110

Main Features

• 10 Number memory

Allows you to store and dial 10 numbers at the touch of a few buttons.

• Auto-talk/standby

Automatically connects the line when the handset is lifted from the base.

• Caller Display*

(a BT Select Service)

When used with a Caller Display service, you can see call information via the LCD such as the name or number (or both) of the person calling.

• Call timer

Monitors the duration of the call.

• Call transfer with multi handsets

Allows transfer of calls between handsets.

• Expandability

Up to 5 extra handsets can be registered to a single base station, without the need for additional wiring.

• Handset and base station ringer volume and tone options

Allows the volume and tone to be adjusted.

• Last number redial

Display and redial the last number called from your handset.

• Low battery warning

Appears when the batteries are low.

• Out-of-range warning

Audible signal alerting the user that communication may not be possible.

• Paging facility

Allows the handset to be paged by the base unit.

• Pause (phone)

Allows you to insert a pause when dialling. For use with switchboards.

• Pre-dialling facility

When dialling a number it appears in the display allowing you to check that it is correct before you dial.

• Range

The handset will operate away from the base unit, up to 50 metres indoors and up to 300 metres outdoors (in ideal conditions).

• Recall

Used when transferring calls, for using certain BT Select Services and with switchboards.

• Register the handset on up to 4 base stations

• Secrecy button

Allows you to speak to someone else in the room without your caller hearing the conversation.

• Switchboard compatible

Will operate on certain switchboards.

• TouchTone™ dialling

Callers on modern digital exchanges benefit from faster connections and can access a wide range of extra services.

*A quarterly fee is payable.

Notes:

(1) At least 1 Diverse Executive Handset should be sold with the Diverse ISDN to allow customers to configure the system fully.

* A quarterly fee is payable

** In ideal conditions.

† All features available from the Diverse base station are available via the Diverse Repeater

Diverse ISDN

Main Features

• 3-Way calling (system generated)

Allows 3-Way conference calling between one internal and 2 external callers or between 2 internal and one external caller.

• Call barring

Barring all outgoing calls except 4 programmable numbers, or barring specific numbers from individual handsets, or barring external calls from individual handsets.

• Calling line identification*/**

Shows the number calling you (the name will also show if it is stored in the handset directory of the Executive Handset).

• Call transfer

Allows you to transfer calls to another extension and toggle between internal and external callers during a call.

• Digital speech quality

Clear sound, (as good as a corded phone).

• Flexible ringing options

Incoming calls will ring all extensions simultaneously (collective ringing) or up to two groups of extensions (group ringing) in a pre-determined order.

• Missed calls list**

Diverse ISDN logs the last 10 missed calls (no answer). The list contains up to 10 entries (no repeats) of calls to the ISDN line.

• Multi-handset facility

Up to 8 cordless DECT handsets can be used plus 2 corded extensions, eg, fax, corded telephone or answering machine.

• Multiple Subscriber Numbering (MSN)** for individual extensions

Allows direct dialling to individual extensions including the 2 corded extensions.

• Range

Ability to make and receive calls from the base up to 50 metres indoors and up to 300 metres outdoors (in ideal conditions).

• Simultaneous internal/external calls

Up to 2 simultaneous external calls or 3 simultaneous internal calls when supported with the appropriate number of extensions.

Top Selling Points

Caller Display*/**

Diverse ISDN connects to an ISDN 2/2e line and is expandable with up to 8 DECT cordless handsets and allows connection of up to 2 analogue corded devices (eg. phone, fax, answering machine)

Each handset can have a personal number via MSN, allowing callers to dial directly to the handset**

On-site mobility without expensive extension wiring

Plug and play – customer installable

* To individual handsets

** Subscription to the ISDN2/2e supplementary service is required, for which an additional connection charge and quarterly rental fee is payable

Ideal for the following customers

- Customers with an ISDN 2/2e line
- Small/home based businesses
- Large businesses with ISDN 2 extensions off the main switch

Additional Information

- Features marked with * require subscription to the ISDN 2 supplementary services for which there is an additional connection charge and rental fee
- Diverse ISDN should be sold with at least one Diverse 3000 Executive Handset & Charger to allow customers to configure the system fully
- Maximum transmission speed of extension socket '0' is 28.8kbit/s, extension socket '9' is 9.6kbit/s
- Handsets sold separately
- The corded extensions '0' and '9' do not support Caller Display

Compatibility

- GAP compatible
- Fully compatible with Diverse 3000/2000/1010 Executive Handsets
- Not compatible with Diverse 1000
- Partly compatible with Diverse 3000 Classic/2000/1010 Additional Handsets (not all ISDN features are supported)
- Compatible with ISDN 2 and ISDN 2e supplementary services

After Sales Support

- Customers experiencing problems with their Diverse ISDN system, either inside or outside warranty, should contact the Diverse Customer Helpline number **Lo-call 0845 790 8070**. In warranty, faulty products will be replaced by a courier exchange service free of charge to customers. (No DF – Direct Fulfilment – exchanges).
- An installation service is available through 150, 152, **Freephone 0800 800 800** and BT RETAIL. CSS: A46001. This service is also available to non-BT customers

Diverse Repeater

Main Features

- **Extends the range of your base station**

The range provided by your existing DECT base station can be extended by up to an additional 50 metres indoors and 300 metres outdoors (in ideal conditions).

- **GAP compatible**

The Diverse Repeater is compatible with DECT GAP compatible base stations like Diverse.

- **Mains power required**

The Diverse Repeater needs to be connected to a mains power socket.

- **Roaming**

Calls can be made and received anywhere within the range provided by the base station and repeater.

- **Simple installation**

Installation requires registration of the Diverse Repeater to your existing base station and plugging into the mains.

- **Wall-mountable**

Can be wall mounted to obtain the best possible range.

Please note: Handover during conversations between base station and Repeater cannot be guaranteed.

Additional Information

- Most DECT base stations are 6 channel systems. An external call taken in the Repeater cell will take up 2 of the 6 channels. This will reduce the number of channels available for other calls.
- The Diverse Repeater is not recommended for data communications (fax, PC modems).
- The Diverse Repeater should be placed within 2 metres of a power socket. Power adapter included with the product.
- Up to 3 Repeaters can be registered to one Diverse base station.
- The Diverse Repeater should be installed in a dry, sheltered environment not exceeding the recommended temperature range: -10°C to 50°C.

Compatibility

- GAP compatible.
- Compatible with all Diverse base stations, excluding Diverse 1000.
- The Diverse 1010 Executive Handset will not support call handover between repeater and base. Calls can still be made and received within the Repeater and base station range.

After Sales Support

- Customers experiencing problems with their Diverse Repeater, either inside or outside warranty, should contact the Diverse Customer Helpline number:
Lo-call 0845 790 8070

Size (approx) 3.1cm high x 11.9cm wide x 12.7cm long
Weight 180 gms

Freestyle 60

Main Features

- **10 Number memory**
Allows you to store and dial 10 numbers.
- **8 Channel auto-selection**
Automatically selects the phone's operating channel to allow the clearest possible reception.
- **Auto-talk/standby**
Automatically connects the line when the handset is lifted from the base.
- **Call indicator light**
Flashes when the phone is ringing. Ideal for people with special hearing needs or in a noisy environment.
- **Call transfer**
Allows calls to be transferred from one handset to another.
- **Call Waiting* (via recall)**
Lets you know when you have another call coming through, while you're already on a call.
- **Digital security code protection**
Prevents unauthorised access to customer's line.
- **Inductive coupler**
Helps people who wear hearing aids with a 'T' switch to hear their caller more clearly.
- **Last number redial**
Automatically redials the last number entered at the touch of a button.
- **Multi-handset capability**
Up to 3 further handsets can be used with a single base station without the need for additional wiring.
- **New stylish design**
Featuring large buttons for ease of use.
- **Pager**
Allows the handset to be paged by the base unit.
- **Range up to 250 metres**
Ability to make and take calls up to 250 metres away from the base outdoors (in ideal conditions).
- **Secrecy button with music on hold**
Allows you to speak to someone else in the room without your caller hearing the conversation.
- **Talktime** (7 hours, 72 hours standby)**
Handsets switch to standby mode when not in use and therefore do not need to be recharged as frequently.
- **Wall mountable**
Can be mounted on a wall either directly or using a bracket (supplied with product).

* A separate quarterly fee is payable.

** When batteries are fully charged.

Freestyle 1025

For full details on the
Freestyle additional handset
& charger included in the
1+1 bundle see
separate page

Main Features

- **10 Number memory**
Allows you to store and dial 10 numbers at the touch of a button.
- **3 Handset ringer melody options**
Allows you to change melodies on incoming calls.
- **8 Channel auto selection**
Automatically selects the telephone's operating channel to allow the clearest possible reception.
- **Answering machine**
Advanced digital recording (14 minutes) technology removes the need for tapes.
- **Call screening/intercept**
Allows you to hear an incoming caller so you can decide whether or not to take the call.
- **Dedicated volume control buttons**
Allows the ringer volume to be set at high low or off. The earpiece volume can be set at either high or low.
- **Expandability**
Extra handsets (extensions) can be used with a single base unit, without the need for additional wiring.
- **Easy access to 1471**
One touch button allowing easy access to BT's Call Return (1471).

• Memo facility

Allows you to record a message on the answering machine which someone can listen to later.

• Paging facility

Allows the handset to be paged by the base unit.

• Pre-recorded outgoing message

Your machine comes with a pre-recorded message.

• Range – up to 200 metres and enhanced call clarity

Ability to make and take calls up to 200 metres away from the base outdoors (in ideal conditions).

• Remote access

This enables you to access your answering machine from another tone dialling phone. You can playback, skip forward, skip back or delete messages using a TouchTone keypad. A security code prevents unauthorised access. You can also interrogate your messages via the handset, using the private playback facility.

• Time/day stamp

Tells you the time and day when messages were left.

• Voice prompts

Useful announcements to help you set up an operate the machine.

Quartet 1500

For full details on the
Quartet 1000 additional
handset included in the
TWIN & TRIO bundles
see separate page

Main Features

- **15 Minute digital recording time**
Advanced digital recording (15 minutes) technology removes the need for tapes.
- **10 Number memory**
Allows you to store and dial 10 numbers at the touch of a button.
- **2 Mailboxes**
2 individual mailboxes (accessible by a PIN) can receive individual messages
- **2 One touch memories**
Store 2 names and telephone numbers for dialling at the touch of a button.
- **3 Handset ringer melody options**
Allows you to change melodies on incoming calls.
- **3 Pre-recorded outgoing messages**
Your machine already comes with 3 pre-recorded outgoing messages.
- **8 Channel auto-selection**
Automatically selects the telephone's operating channel to allow the clearest possible reception.
- **Auto-talk/standby**
Automatically connects the line when the handset is lifted from the base.
- **Call transfer**
Allows calls to be transferred from one handset to another.
- **Call screening/intercept**
Allows you to hear an incoming caller so you can decide whether or not to take the call.
- **Dedicated volume control buttons**
Allows the ringer volume to be set at high low or off. The earpiece volume can be set at either high or low.
- **Digital security code**
Prevents unauthorised access to customer's line.
- **Easy access to BT Select Services**
One touch button allowing fast access to BT's Select Services including: Call Waiting (via Recall).
- **Expandability**
Up to 3 Quartet 1000 Additional Handsets (extensions) can be used with a single base unit, without the need for additional wiring.
- **Inductive coupler**
Helps people who wear hearing aids with a "T" switch to hear their caller more clearly.
- **Remote access facility**
This enables you to access your answering machine from another tone dialling phone. You can playback, skip forward, skip back or delete messages using a TouchTone keypad. A security code prevents unauthorised access. You can also interrogate your messages via the handset, using the private playback facility.
- **Talktime* (7 hours, 72 hours standby)**
Handsets switch to standby mode when not in use and therefore do not need to be recharged as frequently.
- **Time and day stamp**
Tells you the time and day when each message was left before the message is played.
- **Voice prompts**
Useful announcements to help you set up and operate the machine.

* When batteries are fully charged.

Decor 210

Main Features

- **1 Line Liquid Crystal Display (LCD) with icons**

Displays dialled numbers. Also displays numbers stored in memory and other visible information.

- **10 Two-Touch memories (Quickdial)**

Allows 10 stored numbers to be dialled at the touch of 2 buttons

- **3 One-Touch memories**

Allows 3 stored numbers to be dialled at the touch of a button. If pressed with handset down, it will automatically dial out direct from handsfree.

- **Call timer**

Monitors duration of a call.

- **Handsfree operation/volume control**

Timesaving and convenient – allows you to hold a conversation without lifting the handset. Offers 5 volume settings.

- **Last number redial**

Automatically redials the last number entered at the touch of a button.

- **Pre-dialling facility with dial button**

When dialling a number it appears on the display, allowing you to check it is correct. The number can then be dialled by pressing a single button.

- **Recall**

Used when transferring calls, for using certain BT Select Services and with switchboards.

- **Ringer tone option**

Allows you to set the ringing pitch of the phone.

- **Ringer volume control**

Allows you to choose how loud the phone rings. Also allows you to switch ringer off.

- **Secrecy (music on hold)**

Allows you to speak to someone else in the room without your caller hearing the conversation. Callers are entertained with music whilst being put on hold, reassuring them they have not been cut off.

- **Visual ring indicator**

Flashes when the phone is ringing, even when ringer set to off. Ideal for people with special hearing needs or in a noisy environment.

- **Wall mountable**

Can be wall mounted using the bracket provided.

Relate 550 (Friends & Family)

Main Features

- **10 Number memory**
Allows you to dial out your 10 Friends & Family numbers at the touch of one button. The numbers can each be up to 32 digits long. To change numbers simply repeat the process used for storing the original numbers.
- **Easy access to BT Call My Bill service**
Use the 'Call My Bill' button, to find out how much you have spent on calls since your last telephone bill. Calls are free. You will need to have your telephone bill and BT customer number (found in top right hand corner of the bill) to hand.
- **Easy updating of BT Friends & Family numbers**
Using three simple programming keys you can store and dial up to 10 Friends & Family numbers. Furthermore, you can inform BT of the numbers to qualify for your Friends & Family discount* by using a dedicated button and following the instructions in the user guide.
- **Last number redial**
Automatically redials the last number entered at the touch of a button.
- **Recall**
Used when transferring calls, for using certain BT Select Services and with switchboards.
- **Ringer volume control (Hi/Low/Off)**
Allows you to choose how loud the phone rings.
- **Secrecy button**
Allows you to speak to someone else in the room without your caller hearing the conversation.
- **Wall mountable**
Phone can be mounted on a wall using a bracket (supplied with product).

** Can include one mobile number and one international number. There is a limit of 30 numbers in any billing cycle.*

- 1 Volume switch for ringer

This lets you choose how loud the phone rings:

- HI for loud
- LOW for quiet
- OFF if you don't want to be disturbed

- 2 Important exchange switch (mode).

You may have to adjust it before you use your Converse 180.

At home:

- Set it to TB and try to make a call.

If it works, you are on a modern exchange and it can be left on TB.

If not:

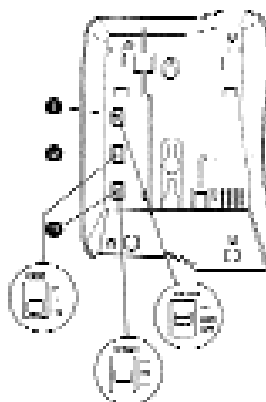

- Set it to P.

On a switchboard set:

- T for an Earth Recall
- TB for Timed Break Recall

- 3 Ringer tone

Allows you to select 3 alternative ringing sounds.

Top Selling Points

50 Name and Number Directory

50 Calls list

Caller Display*

Dual LED for visual ring alert & new call indication

Unique 2 sided back lit LCD

** A separate quarterly fee is payable*

Ideal for the Following Customers

- Residential customers (upgrading from adjuncts)
- High usage customers
- New second phone/extension phone purchasers
- Single line businesses/SoHo

Main Features

• 50 Calls List

Stores a list of up to 50 incoming calls which can be easily accessed for dialling out. Also records the time and date the call was received, and the name if stored in the directory.

• 50 Name and number directory

Allows you to store up to 50 names and telephone numbers which can be easily accessed for dialling out.

• Dial from calls list & directory

Automatically dials a number stored in the calls list or directory.

• Call indicator light (red)

Flashes when the phone is ringing. Ideal for people with special hearing needs or in a noisy environment.

• Call Timer

Monitors the duration of the call.

• Caller Display*

(a BT Select Service)

When used with a Caller Display service, you can see call information via the LCD such as the name or number (or both) of the person calling.

• Delete key

It is possible to delete telephone numbers stored in the directory or the calls list. Entries can be deleted from the calls list without lifting the handset.

• Handset speaker volume control

Allows you to adjust the speaker volume to a level that suits you.

• LCD contrast control

Adjusts the contrast of the Liquid Crystal Display to suit.

• New calls indicator (green)

A flashing LED identifies that a call has been received since you last viewed the calls list.

• Ringer volume control

Allows you to choose how loud the phone rings.

• Secrecy with LED

Allows you to speak to someone else in the room without your caller hearing the conversation. The LED will flash to indicate that secrecy is on.

• Scroll up / down keys

Allows you to scroll up/down through the calls list and directory. Also allows you to select settings. When the handset is down scroll buttons can be used to view calls list.

• Unique 2 sided backlit LCD

Caller information can be seen from either side of the backlit LCD. Backlight can be switched on or off so battery life is conserved for longer.

** A separate quarterly fee is payable*

Additional Information

Decor 310

Main Features

- **3 Line Large Liquid Crystal Display (LCD) with icons**
Displays dialled numbers. Also displays the names and numbers stored in the directory, time and date and other visible information.
- **30 Name & number directory**
Allows you to store 30 names and telephone numbers which can easily be accessed for dialling out.
- **99 Calls list (name and number matching)**
Stores a list of up to 99 incoming calls. Names of callers will also be stored if the caller is already in the directory. The date and time calls were received is also displayed.
- **Alarm**
Can be used to act as a reminder or to wake you up.
- **Caller Display* supporting Call Waiting* (cable compatible)**
When used with a Caller Display service, you can see the number of the person calling. When used with a Call Waiting and a Caller Display service you can see the number of the second caller whilst engaged on another call. The names will also be displayed if stored in the directory.
- **Handsfree**
Time saving and convenient – allows you to hold a conversation without lifting the handset. Offers 5 volume settings.

• New Call indication

A flashing icon on LCD identifies a call has been received since you last viewed the calls list.

• Pre-dialling facility with dial button

When dialling a number it appears on the display, allowing you to check it is correct. The number can then be dialled by pressing a single button.

• Real time clock

Built in clock feature.

• Ringer volume control

Allows you to choose how loud the phone rings. You can also turn the ringer off.

• Secrecy (music on hold)

Allows you to speak to someone else in the room without your caller hearing the conversation. Callers are entertained with music whilst being put on hold, reassuring them they have not been cut off.

• Selective group ringer tones**

Allows you to select from a choice of 4 ringer tones, and assign each number stored to 4 different caller groups, i.e. Family, Friends, Business & VIP.

• Voicemail indication

When used with a voicemail service**, if a message has been received, an envelope icon is displayed on the LCD until it has been accessed.

* A separate quarterly fee is payable

** You must subscribe to a Caller Display service for this feature to work.

The In Touch range of products

These important additions to our range are very different in character and purpose to other BT phones, so we are taking this opportunity to explain how they work in detail.

This is particularly necessary as some of the In Touch products need to function in combination with each other and are sold as 'packages', as well as individually. Their operation also relies – in some cases – on connection to an external service that is not provided by BT. This obviously needs to be brought to the attention of your customers.

What the products are for

The In Touch range of products have been specially designed to help those who need care and those who provide care. They provide an essential 'lifeline' and so give peace of mind and greater independence to a wide range of customers, by offering reassurance that help is at hand at the touch of a button.

There are several types of phone and 3 packages available. A full description of each individual product in the portfolio is given in the standard format in the following pages.

All the In Touch products can be purchased separately or in the packages as outlined

Here is a summary of the packages available:

IN TOUCH 1000 CARELINE PACKAGE

The package consists of the In Touch 1000 phone and In Touch Pendant (sold as separate items)

In Touch 1000 phone

The phone is targeted at the careline service provider, who supplies it to the person being cared for, when they subscribe to their service

In Touch Pendant

An emergency trigger for the In Touch 1000 and 2000 phones

(The products above are not representative of size)

The In Touch 1000 Careline Package is designed for professional careline service providers.

Designed to work with the majority of careline protocols, the BT In Touch 1000 Careline Package offers something over and above current lifeline products. It brings together attractive design and functionality, quality and reliability at a competitive price plus the BT brand with its inherent appeal for the aged market. A panel on the In Touch 1000 phone also enables the service provider to brand the phones they buy.

The design alone of the In Touch 1000 Careline Package will enable carelines to grow their business by targetting a wider, younger audience who may have been deterred from using services of this kind because of the design of competitors' lifeline products.

Ideal for the following customers

- Decision makers in careline service provision organisations.

What is a careline service provider?

A careline service provider offers emergency support to aged and disabled residential customers. These services are typically managed by local authorities and charities and offer a 24-hour call centre manned by trained operators.

The In Touch range of products

IN TOUCH 2000 RETAIL PACKAGE

The package consists of the In Touch 2000 user phone, In Touch 2000c carer phone and In Touch Pendant

Sold as a package or as separate items.

In Touch 2000 phone

The phone for the customer who requires care

In Touch Pendant

An emergency trigger for the In Touch 1000 and 2000 phones

In Touch 2000c phone

The phone for the person providing the care

(The products here are not representative of size)

The In Touch 2000 Retail Package is designed for 'informal' carers – people who provide intermittent care for a friend, relative or neighbour in their own home.

Ideal for the following customers

- Residential customers who are 'informal' carers and who balance their work or family responsibilities, with looking after someone
- Residential customers who rely on someone to provide intermittent care because they are elderly, disabled, infirm or temporarily vulnerable due to ill health or an accident.

How the In Touch 2000 Retail Package works

Flexibility is the key with the In Touch 2000 Retail Package. This is because BT understands that the needs of those who provide care and those who need care, can often change – sometimes at short notice. Four easy-to-use 'operating modes' are available:

1. Where informal carers are providing all the care
2. Where customers want to switch permanently from informal care to a careline service*
3. Where informal carers want to arrange holiday cover provided by a careline service*
4. Where customers want joint care from informal carers and a careline*

* A non-BT service charge is payable

IN TOUCH 2000 PLUS PENDANT PACKAGE

The package consists of the In Touch 2000 user phone and In Touch Pendant

In Touch 2000 phone

The phone for the customer who requires care

In Touch Pendant

An emergency trigger for the In Touch 1000 and 2000 phones

Top Selling Points

Attractive product and pendant design enables carelines to target a younger/broader profile of customer which results in:

- Increased number of customers
- Customers subscribing for longer service periods
- Increased revenue for the careline service provider

BT brand that most careline customers will value

Careline service provider branding opportunity

Compatible with most careline service provider protocols

High quality, reliable 'lifeline' telephone

Ideal for the following customers

- Decision makers in careline service providers, typically managed by local authorities and charities, who will then offer the In Touch 1000 as part of their service to aged and disabled residential customers.

Main Features

• 3 Quickdial memories

Used to store Quickdial memory numbers, eg, careline information service, doctor, friends and family.

• Alert warning (local to user and sent to careline)

Warnings include: no mains power, batteries low, line disconnected, no emergency number stored, pendant battery low.

• Back-up rechargeable batteries

Back-up batteries will automatically recharge once mains power is connected

• Built-in emergency sequence

The user simply has to press the pendant button, which will automatically activate the emergency sequence and contact the careline service provider the customer has subscribed to.

• Cancel button

Cancels the emergency sequence.

• Easy grip handset

Assists those with dexterity problems.

• Emergency button

When pressed activates the emergency sequence.

• Hands-free

Allows the user to use the phone without lifting the handset, either in an emergency situation or in normal telephone use. The caller's voice is heard through the speaker.

• Inductive coupler

Helps people who wear hearing aids with a "T" switch to hear their caller more clearly.

• Plinth

Phone can be used in three positions: flat, raised and wall mounted.

• Remotely programmable by the careline service provider

The careline service provider can remotely program the memories and emergency routine of the user phone.

• Ringer volume and tone control

Used to adjust the volume and tone of the ringer.

• Set-up button

Used to check and change optional features including spoken digit confirmation.

• Supports 2 user pendants

Two people in the same household can have their own pendant working to the one user phone.

• Volume button

Used to adjust the handsfree (loudspeaker) volume.

Additional Information

- Radio Frequency and bandwidth: 173Mhz, 25kHz
- Radio Supply: 9V, 300mA
- Batteries: 6 x AA Rechargeable
- Standby Power: 7 hours

In Touch 2000 User Phone

Main Features

• 10 Name & Number Directory

Allows you to store 10 names and telephone numbers which can easily be accessed for dialling out.

• 3 Quickdial memories

When the emergency status is on these will be contacted if the emergency button is pushed. When off they can be used to store any frequently used numbers, eg, careline information service, doctor, friends and family.

• Alert warning (local to user and sent to carer)

Warnings include: no mains power, batteries low, line disconnected, no emergency number stored, pendant battery low.

• Announce button

Used to listen to the pre-recorded emergency announcement and to record your own personal emergency message (via the handset).

• Built-in emergency sequence

The user simply has to press the pendant button, which will automatically activate the emergency sequence and contact the allocated emergency contact numbers or the careline service provider.

• Calls button*

Used to access the call list.

• Calls indicator light

Indicates new calls have been received.

• Cancel button

Cancels the emergency sequence. Also used to delete entries in the Directory and Calls List.

• Easy grip handset

Assists those with dexterity problems.

• Emergency button

When pressed, activates the emergency sequence.

• Hands-free

Allows the user to use the phone without lifting the handset, either in an emergency situation or in normal phone use. The caller's voice is heard through the speaker.

• Inductive coupler

Helps people who wear hearing aids with a 'T' switch to hear their caller more clearly.

• Liquid Crystal Display (LCD)

Displays time, date, call and user information.

• Plinth

Phone can be used in three positions: flat, raised and wall mounted.

• Remotely programmable by the careline service provider

The careline service provider can remotely program the memories and emergency routine of the user phone.

• Ringer volume and tone control

Used to adjust the volume and tone of the ringer.

• Set-up button

Used to check and change optional features including spoken digit confirmation.

• Supports 2 user pendants

Two people in the same household can have their own pendant working to the one In Touch 2000 phone.

• Volume button

Used to adjust the handsfree (loudspeaker) volume.

**A separate quarterly fee is payable*

Top Selling Points

Attractive product design and the BT brand

Built-in emergency sequence

Caller Display* Call Waiting*

Flexibility to accommodate changes in personal circumstances. Careline service provider can take fourth emergency call, temporary cover to enable carer to break from their responsibility and permanent cover**

Supports two user pendants

**A separate quarterly fee is payable **A non-BT service charge is payable*

Ideal for the following customers

- Residential customers who are 'informal' carers who balance their work or family responsibilities, with looking after someone and want to purchase an In Touch 2000 phone for someone they care for
- Residential customers who rely on someone to provide intermittent care, be it because they are elderly, disabled, infirm or temporarily vulnerable due to ill health or an accident and already have a designated carer using an In Touch 2000c phone

Additional Information

In Touch 2000c Carer Phone

Main Features

• 10 Name & Number Directory

Allows you to store 10 names and telephone numbers which can easily be accessed for dialling out.

• 3 Quickdial memories

When the emergency status is on these are compared against the incoming number and if there is a match the phone will beep and flash. They can also be used to store frequently dialled numbers.

• BT Select Services*

The In Touch 2000c works with all BT Select Services. The most useful are: Caller Display (the carer must subscribe to a Caller Display network service for In Touch to work), Call Waiting and Call Diversion.

• Built-in emergency sequence - emergency light & beeps

Having subscribed to a Caller Display network service, the carer benefits from knowing when the person they are caring for, (their user), is trying to contact them. When the In Touch 2000c has received the call from the user, the emergency light will flash with loud continuous beeps.

• Built-in emergency sequence - call clear down

In the event of an emergency call, the carer can immediately end the call and ring for help, e.g. the emergency services, even if their user has not hung up. This feature is unique to the In Touch 2000c Carer Phone.

• Built-in emergency sequence - remote control of emergency call conversation

After a 3-digit security code has been entered the carer is able to remotely control the emergency call. The carer can remotely control the amplification through the handsfree loudspeaker of their users In Touch 2000 phone.

• Cancel button

Cancels the emergency sequence. Also used to delete entries in the Directory and Calls List.

• Divert button*

Used to access and set-up the diversion of calls to another phone, eg. a mobile phone using a Caller Diversion network service.

• Hands-free

Allows the user to use the phone without lifting the handset, either in an emergency situation or in normal telephone use. The caller's voice is heard through the speaker.

• Plinth

Phone can be used in three positions: flat, raised and wall mounted.

• Ringer volume and tone control

Used to adjust the volume and tone of the ringer.

• Set-up button

Used to check and change optional features, eg LCD display contrast.

• Supports up to 3 In Touch 2000 user phones

Three In Touch 2000 user phones can work with the one In Touch 2000c carer phone.

• Volume button

Used to adjust the handsfree (loudspeaker) volume.

Top Selling Points

Attractive product design and the BT brand Differentiates emergency calls (emergency beeps and flashing light)

Caller Display*, Call Waiting* and Call Diversion*

Carer control of emergency situation: differentiated call, security code, remote control in conversation, call clear down to be able to immediately make an external call, eg. emergency services

**A separate quarterly fee is payable*

Ideal for the following customers

- Residential customers who are 'informal' carers who balance their work or family responsibilities, with looking after someone and want to purchase an In Touch 2000c carer phone to help them when caring.

In Touch Pendant

Price includes just one Pendant and two attachments

Top Selling Points

Can be worn in different ways (using detachable mounts): wrist strap and necklace

Remote answering of calls

Remotely triggers the emergency sequence in the In Touch 1000 or 2000

Up to 4 years battery life*

Up to 50 metre range

* Based on an average of two presses per day

Ideal for the following customers

- Residential customers who are 'informal' carers who balance their work or family responsibilities, with looking after someone and want to purchase an additional pendant for a second user where a BT In Touch 1000 or 2000 is already being used in the household
- Residential customers who rely on someone to provide intermittent care, be it because they are elderly, disabled, infirm or temporarily vulnerable due to ill health or an accident and have a partner already using a BT In Touch 1000 or 2000
- Decision makers in careline service providers, typically managed by local authorities and charities, who will then offer the In Touch 1000 as part of their service offering to aged and disabled residential customers.

Main Features

- **Alert warnings (local to user and sent to careline)**

- **Detachable mounts**

The user can easily change the way they wear their pendant with the use of detachable mounts: wrist strap and necklace.

- **Emergency sequence trigger**

The user simply has to press the pendant button, which will automatically activate the emergency sequence in the In Touch 1000 or 2000 and contact the designated carers or careline service provider.

- **Remote answering of calls**

Allows the user to receive an incoming call simply by pressing the pendant button. To end the call the user need only press the pendant button a second time.

- **Up to 4 years battery life***

The pendant battery will typically last for up to 4 years, based on two presses a day. Important note: It is recommended that the user replaces their pendant with one year battery life remaining (1 year battery life indication is given).

- **Up to 50 metre range**

The pendant can work up to a range of 50 metres from the In Touch user phone. Important note: the range can be greatly reduced by certain environmental conditions, (i.e. in buildings with thick walls or near bodies of water, etc).

- **Waterproof**

The In Touch Pendant is designed to allow the user to wear it anywhere in their home, including in the bath.

Additional Information

- Radio Frequency and bandwidth: 173Mhz, 25kHz
- Transmitter Power: 9V
- Range: up to 50m depending on environmental conditions
- Battery Life: Up to 4 years, based on an average of two presses per day
- Waterproof (IP67)

*The customer will need to subscribe to BT's Caller Display Service for which a quarterly fee is payable

easicom 1000

Top Selling Points

Facility to send faxes (text only) to any fax machine in the world.

Fully featured telephone with call management

Send and receive simple e-mails – no need to subscribe to ISP

Send SMS (text) messages to any SMS compatible mobile phone

Supports interactive text-based services, giving access to home shopping and information services, including electronic Yellow Pages and BT Select Services*

Very easy to use – designed to ensure no prior IT knowledge or experience of using e-mail necessary

* A quarterly fee is payable

Ideal for the following customers

- People working from home
- Technophobes – customers that are IT illiterate
- Senior citizens keeping in touch with family and friends
- Consumers who do not have access to a computer but require e-mail and/or home shopping facilities
- 'Gadgeteers' (people interested in new/hi-tech products)
- People who have limited space available for essential office/IT equipment
- Large corporations possibly, for use in a customer service environment.

Main Features

• Caller Display* and Call Waiting*

When used with Caller Display and Call Waiting services, you can see call information in the Liquid Crystal Display (LCD). The time and date of the most recent incoming calls are stored and the name of the caller is also displayed, if stored in the directory.

• Call timer

Monitors the duration of a call.

• Contrast control

Adjusts the contrast of the LCD to improve legibility.

• E-mail facility (text only, no attachments)

E-mail facility allows up to 5 separate accounts to have simple e-mail functions. Also includes fax send capability (text only). Password protection included for each e-mail account.

• Extension in use indication

Tells the user the line is in use (some of the interactive phone functions may not operate with this indicator on).

• Incoming* and outgoing calls list

Stores a list of up to 50 incoming calls* and up to 10 outgoing calls. Also includes a reminder list, with alarm facility.

• Interactive text services support using ADSI

For shopping and information services.

• Name and number directory

Allows you to store up to 150 names with associated telephone number, addresses and e-mail addresses which can be easily accessed for dialling out.

Also, the directory can be accessed quickly using the 'search' facility.

• Phone line disconnected indicator

Tells the user the phone has been disconnected.

• Printer port

Can connect a small printer to print out e-mails/faxes and other useful information. (Available exclusively through the helpline.)

• Qwerty keyboard

To easily create e-mails/faxes for onward despatch to any e-mail address or fax number.

• Recall/Timed Break Recall only

Used when transferring calls on switchboards and for using certain BT Select Services.

• Ringer tone options

Sets the ringing pitch of the phone.

• Secrecy button

Allows you to speak to someone else in the room without your caller hearing the conversation.

• Smart redial

Remembers the pauses between numbers you dial. This is useful for calling home banking or automated services.

• Stores interactive service information, such as BT's menu driven Select Services

• Telephone assistant

Includes calendar, calculator with tabulation, currency and unit/measures conversion, notepad, world time (with alarm) and international dialling codes.

• Text size change

Will increase size of text for easy viewing.

Additional Information

- REN=1
- Mains power required
- Memories require battery back-up: 4 x AA alkaline batteries
- Wall mountable
- The e-mail and home shopping services are provided by and accessed through **talk21**. Other service providers may offer other additional or alternative services in the future. Access to some of these services will incur premium rate call charges. Services will be charged to the normal telephone bill

After Sales Support

- In warranty products: if helpline cannot resolve the query over the phone, the customer will be advised to return the product to the point of sale.
- Out-of-warranty products t.b.a.
- Product Helpdesk: 0906 683 6836 (for product information, call charged at 25p

connection plus local call rate)

- For automated e-mail registration call 0870 2430246 (maximum 8p per minute)
- Helpline 0906 302 0069 for e-mail queries (calls charged at 50p per minute)
- One year guarantee

Compatibility

- DELs employing MF TouchTone dialling. Will also work with switchboards that offer time break recall

Response 15 Plus

Main Features

- **18 Minutes high quality digital recording**
All messages are recorded digitally allowing consistent quality reproduction and fast re-setting.
- **Call intercept**
This gives you the option to answer incoming calls from an extension on the same phone line, even if the answering machine has started to answer.
- **Call screening**
Allows you to hear an incoming caller so you can decide whether or not to take the call.
- **Memo messages**
Allows you to record a message on the answering machine which someone can listen to later, instead of leaving a written note.
- **Message capacity full alert**
Alerts you when the recording capacity is reached and no further messages can be taken.
- **Message counter**
Counter indicates the number of messages and memos left in the mailbox.
- **Pre-recorded outgoing message**
A message is pre-recorded on the answering machine (this can be overwritten with your own outgoing message).
- **Remote access**
This enables you to access your answering machine from a tone dialling phone. You can playback, skip forward, backward or delete messages using a TouchTone keypad. A PIN number prevents unauthorised access.
- **Selective delete**
It is possible to delete individual messages.
- **Skip forwards and backwards**
When operating the answering machine you are able to move forwards and backwards to listen to your messages.
- **Time and day stamp**
The built-in voice tells you the time and day when a message was left.
- **Time saver**
Saves time when remotely accessing your answering machine. If messages have been left your answering machine will answer after two rings. If no messages have been left it will answer after six rings.
- **Variable ring delay**
Choose how many rings before the answering machine answers the call.
- **Voice prompts**
Useful announcements to help you set up and operate the machine.

1471 facility

2 Pre-recorded outgoing messages

36 Minutes high quality digital recording time

Answer only facility

VIP feature

Ideal for the following customers

- Business users
- Small to medium businesses
- People working from home
- Home based businesses
- People trading up from tape machines to digital
- Residential customers

Main Features

• 36 Minutes high quality digital recording

All messages are recorded digitally allowing consistent quality reproduction and fast re-setting.

• 2 Pre-recorded outgoing messages

Two messages are pre-recorded on the answering machine (these can be overwritten with your own outgoing messages).

• Answer-only facility

Answering machine can be set to play an outgoing message only and not allow a caller to leave a message.

• Audible message alert

An audible beep alerts you that new messages have been received. This can be switched on or off.

• 1471 Button

In answer mode this will record the telephone number of your callers whether they leave a message or not. On playback you will be given the caller's number. (unless the number was withheld) and the time of the call.

• Call intercept

This gives you the option to answer incoming calls from an extension on the same phone line, even if the answering machine has started to answer.

• Call screening

Allows you to hear an incoming caller so you can decide whether or not to take the call.

• Memo messages

Allows you to record a message on the answering machine which someone can listen to later, instead of leaving a written note.

• Message capacity full alert

Alerts you when the recording capacity is reached and no further messages can be taken.

• Message counter

Counter indicates the number of messages and memos left in the mailbox.

• Pause

Allows playback of messages to be stopped temporarily.

• Remote access

This enables you to access your answering machine from a tone dialling phone. You can playback, skip forward, backward or delete messages using a TouchTone keypad. A PIN number prevents unauthorised access.

• Selective delete

It is possible to delete individual messages.

• Skip forwards and backwards

When operating the answering machine you are able to move forwards and backwards to listen to your messages.

• Time and day stamp

The built-in voice tells you the time and day when a message was left.

• Time saver (2/6 only)

Saves time when remotely accessing your answering machine. If messages have been left your answering machine will answer after two rings. If no messages have been left it will answer after six rings.

• Variable ring delay

Choose how many rings before the answering machine answers the call.

• VIP feature

Allows designated callers to beep you if the Response 75 is in the 'answer' mode. If you do not answer the caller can still leave a message.

• Voice prompts

Useful announcements to help you set up and operate the machine.

Ultimate 106 1+6 Telephone System

Main Features

•50 Memory speed dialling

Stores up to 50 numbers in 2-digit locations which allows easy access to frequently used numbers.

•Automatic call back

Lets you know when the line is free, when another extension is free or when the person you are calling is off the phone.

•Call Director

Routes calls direct to the extension required.

•Day and night mode

Allows you to control at what time your extensions will ring.

•Dedicated fax extension

Fax calls can be directed straight to the fax machine, or with Call Sign, the user can identify if the incoming call is a fax or telephone call.

•Easy customer installation

All parts required for the installation are supplied with the Ultimate 106 Installation Kit. The system is easy to set up and can be programmed with the use of any existing TouchTone phone.

•Hotline extension

Lift the handset and a pre-set number is automatically dialled.

•Music on hold

Plays music whilst callers are on hold. Compatibility with CD player enables own recordings to be played.

•Optional door intercom/entry system

Allows you to talk to visitors or unlock the door from any extension. Visitors can leave a message on voicemail when you are out. Door intercom calls can be forwarded to an external number where you can be reached (eg. mobile number).

•Payphone extension

Direct access to outside line with no need to dial 9 or install an additional line

•Personal voicemail for each individual extension.

•Privacy on calls

Other extensions cannot listen in or interrupt a call.

•Simultaneous internal and external calls

Can make 1 external call as well as 2 internal calls. simultaneously.

•Talking Caller ID*

Announces the number of the caller or the name if stored in the memory.

Top Selling Points

1+6 Telephone system for the home or small business.

Call Director ensures callers are directed straight through to the person they wish to speak to.

Have total privacy as calls cannot be interrupted from other extensions.

Personal voicemail on individual extensions ensures users are not inconvenienced by taking messages for other members of the household/business.

With the optional Door Intercom, you can talk to visitors or let them in from any extension, or they can leave a message on your answering machine when you are out.

* A separate quarterly fee is payable

Ideal for the following customers

- Tele-workers
- Home-based businesses
- Large households/families
- Executive homes

Additional Information

- To benefit from Talking Caller ID, it is required to subscribe to the network service; Caller ID.
- Requires mains power socket

BT On-Air 1800

Main Features Data

- **56 kbit/s modem speed**
Same reliability and performance as wired internet modem.
- **Compatible with Windows 98/Me/2000 operating systems**
- **DECT technology for reliability**
The radio link between the base and the USB unit connected to the PC is based on proven DECT technology for reliability and digital security.
- **Easy installation**
Easy plug and play installation - no need to open up your PC. Simply plug-in the USB module and install the software onto your PC or laptop (software included with this pack on CD).
- **Truly wireless and portable**
No power socket needed for USB unit. Small design that can be clipped onto laptop for true portability.
- **USB unit connects to PC**
The pack includes the BT On-Air USB unit that connects to your PC and communicates with the modem in the base station
- **Wireless Internet Connection**
Surf the internet and send/receive e-mails without wires.

Main Features Voice

- **20 Number directory**
Can store up to 20 telephone numbers which can be easily accessed for dialling out.
- **3 Colour handset fascias**
Medium Blue/Grey/Yellow.
- **Caller Display ***
Caller Display shows you the number of the person calling you on the handset display, providing the number is not withheld.
- **Call screening/Intercept**
Allows you to hear an incoming caller so you can decide whether or not to take the call.
- **Message playback on base or handset**
Answering machine messages can be played back on base's loudspeaker or privately through a handset.
- **Remote access**
Enables you to access your answering machine and listen to messages left from another tone dialling phone. A PIN number prevents unauthorised access.
- **Up to 15 minutes digital recording**
All messages are recorded digitally allowing consistent quality reproduction and fast re-setting.
- **Wall mountable**
Can be mounted on a wall either directly or using a bracket (supplied with product).

* A separate quarterly fee is payable.

Top Selling Points

Wireless Freedom to Talk & Surf: All in one digital cordless telephone answering machine and wireless 56k Internet Modem

BT Speedway ISDN PCI Card

Main Features

- **Application software allows your PC to:**

- access your Internet Service Provider
- send and receive e-mail
- send and receive faxes
- transfer data at high speeds
- access bulletin boards
- answer calls*.

- **Channel bonding to 128kbit/s**
BT Speedway products allow customers to use the full capacity of both their digital (ISDN or BT Highway) channels to send data faster than simply using one 64kbit/s channel.

- **Compatible with Windows 95/98, NT 4.0 and 2000**

- **Easy software installation**
Speedway products come with their own software application suite, Speedway!, on CD-ROM.

- **Full Helpline and Website support**

Customer support for Speedway products is available via the Speedway Helpline and from the Speedway Website on <http://www.speedway.bt.com> (All the latest upgrades and product information are available from this site.)

- **High speed Internet access – 128kbit/s**

Faster than conventional analogue modems meaning that you spend less time on-line accessing the Net or transferring data. This gives vital cost and time savings and enables you to use your PC more efficiently.

- **PCI card which links your PC to ISDN2e or BT Highway**

This card can be installed into your PC to give you direct access to the Internet, e-mail and fax services.

- **Plug and play compatible**

The software detects the card automatically within the PC, making it easy to install and use.

** A sound card is required for this function*

Top Selling Points

LGY	872271	5016351211625
	872301	(Trade Only)

BT On-Air DECTf@x Plus

Main Features

- **Caller Display**
Displays call information, in the fax and handset LCD, such as the name or number of the person calling. (A quarterly fee is payable).
- **Directory (alpha numeric)**
Allows you to store 100 names and telephone numbers in the directory.
- **E-mail facility**
Send documents or recorded voice messages to an e-mail account. Receive and print out e-mails without the use of a PC. Allows you to send e-mails using the qwerty key board.
- **Full hands-free dialling/operation**
Allows you to dial a number and hold a conversation.
- **Integral digital answering machine (20 Minutes)**
Built-in answering machine facility. Outgoing message: answering and recording – 20 seconds, answering only – 90 seconds. Additional answering machine functions include: memo function, selective delete, messages date and time, call screening and intercept (also via handsets).
- **Large Liquid Crystal Display (LCD) (2 line x 16 characters)**
Displays dialled numbers. Also displays numbers and names stored in the memory and other visible information ie, status of faxes sent and received.

• Mailboxes

Allows you to create up to 5 mail boxes (accessible by a 4 digit code) which can receive fax or voice messages.

• Multi-handset capability

Up to 3 additional GAP/DECT compatible handsets can be registered to the fax base station. The features of the handset include a 300 metre outdoor and 50 metre indoor range from the fax base station (in ideal conditions), intercom and transfer of calls between base and handset, and between two handsets, simultaneous internal/external calls, ie, one handset can make an outgoing call whilst 2 other handsets are in use on internal calls, and call screening and intercept of messages using a handset.

• Navigator

User friendly multi-directional keys allow for quick and easy access to all functions.

• Prints out web pages

Type in a URL and print out the WEB page.

• Qwerty keyboard

To enter and recall names from the directory and to easily create and transmit short faxes and/or cover sheets directly via the Liquid Crystal Display (LCD).

• Voice recording

Record a voice message and send it to an e-mail account.

Top Selling Points

A compact plain paper fax with digital answering machine and digital cordless handset with charger. Facility to register up to 3 additional DECT handsets to the base station on the fax, and send and receive e-mails without a PC

Fax and telephone calls can be received on the one line, using the cordless handsets. Calls go to the handset and faxes divert to the fax machine

Fully integrated, it eliminates interference which can be experienced when using separate products

Prints web pages

Sends voice recorded messages to e-mail accounts

Superb voice quality

Ideal for the following customers

- People working from home
- Small to medium businesses
- New fax customers
- People wishing to trade up from thermal to a plain paper fax

Additional Information

- Transmission speed – 14,400 bps
- Replacement ribbon capacity – 230 pages
- Replacement print ribbons available on **Freefone 0800 590 009**
- Power supply – 230V/50Hz
- Up to 50 hours standby capacity on handset
- Up to 5 hours talktime on handset
- GAP compatible
- Up to 20 page document memory
- **Box contains:**
One fax base unit/station
One GAP/DECT telephone handset
One power lead
One telephone line cord
User Guide
Registration warranty card
Starter ribbon (up to 20 pages with smartcard**)

*** The unit will only operate when the smart card is fitted. A new smart card is supplied with each new ribbon and enables you to monitor ribbon usage.*

After Sales Support

- Helpline number:
Lo-call 0845 603 1066 with free courier exchange during 12 month warranty period.
- **Freefone 0800 590 009** for consumable orders.

Compatibility

- Group 3

Size(approx) 26cm deep x 27.5cm wide x 15cm high (fax base, unit closed with radio module attached, without paper)

Weight 2.7 kgs

3. All the product helplines are for END USERS/CUSTOMERS ONLY

Glossary of terms

2 PSTN line system

A maximum of 2 separate telephone exchange lines can be connected (separate charge payable for DELs).

Abbreviated dialling

Numbers stored in the fax machine's memory can be dialled easily using a short dialling sequence.

Answering machine interface

Allows an answering machine to be connected to your fax machine.

Answer-only facility

Answering machine can be set to play an outgoing message only and not allow a caller to leave a message.

Automatic fallback

Will automatically reduce the speed of transmission to enable both machines to communicate at the same speed.

Automatic 'Switch to line'

This allows you to automatically connect to the telephone line when picking up handset from rest, from base station or charging unit.

Broadcasting (fax)

Saves time by sending single documents to multiple destinations.

Buffer memory

If the receiving paper has run out, faxes can be stored in memory and printed later.

Channel switch

Enables switching between different analogue frequencies to obtain the best frequency for clarity during communication.

Companding noise reduction

Reduces background noise, providing much clearer reception at all times.

Confidential transmission

Allows you to send a fax to a password protected fax machine (on the receiving side).

DECT (Digitally Enhanced Cordless Telecommunications)

This is the standard for cordless communications. Using advanced digital radio techniques, it makes very efficient use of the available radio spectrum and provides high quality sound and extremely high speech security.

Dual access

If the fax machine you are sending to is busy, documents can be placed in its memory and sent when the machine is free.

End call/follow-on call function

Allows a follow-on call to be made without the need to replace the handset on the base.

Fax transfer

You can program the fax to forward faxes to another number.

Flexible call management

This includes collective ringing, ring priority, manual/automatic line selection.

Fully PBX working

Compatible with most switchboards.

GAP compatible

Compatible with DECT/GAP base stations regardless of manufacturer.

Grey scales (fax)

Better reproduction of non-text images such as drawings and photographs.

Group 3 compatibility

Works on a normal land line (PSN).

Inductive coupler

Helps people who wear hearing aids with a T switch to hear their caller more clearly.

Interactive text services support using ADSI

For home banking, shopping and information services.

Mailbox

Allows contacts to have individual mailboxes (accessible by a PIN) which can receive individual messages (fax or voice, dependent on product).

Manual/automatic answer

Select option where the user may receive faxes automatically or by manually answering the call and then pressing start if a fax transmission tone is heard.

Memo message/facility

Allows you to record a message on the answering machine which someone can listen to later, instead of leaving a written note.

Monitor button

Allows you to hear if a call is answered without lifting the handset.

Multifunctionality

Print, scan, copy, send and receive faxes on a single machine.

Navigator

User friendly, multi-directional keys allow for quick and easy access to all functions.

On-hook dialling

Allows you to dial a number without lifting the handset.

On-hook volume control

Allows an adjustment to the volume whilst the handset is in the cradle.

Paging facility

Allows the handset to be paged by the base unit.

Pause (answering machine)

Allows playback of messages to be stopped temporarily.

Pause (phone)

Allows you to insert a pause when dialling. For use with switchboards.

PC interface

Allows you to connect your fax machine directly to a PC. With additional software (purchased separately), you can receive and send faxes, print and scan directly onto a PC.

PC print resolution

The number of dots per inch used to define the print quality.

Polling

Allows you to retrieve a document from another fax machine, or for another fax machine to retrieve a document from your fax machine. Also called Fax back.

Pre-dialling facility

When dialling a number it appears in the display allowing you to check that it is correct. The number can then be dialled by pressing a single button.

Print engine

The type of engine technology used (ie, thermal, thermal transfer, inkjet, LED and laser).

Private playback

Lets you listen privately to messages left on your answering machine using your telephone handset.

Qwerty keyboard

To easily create and transmit faxes and/or cover sheets directly via the LCD.

Recall

Used when transferring calls, for using certain BT Select Services and with switchboards.

Reset button

Allows you to make follow-on calls without replacing the handset.

Ring time selector

Allows you to set the number of rings before the machine answers your call.

Rotary feature

Facilitates rapid access to your directory, volume and calculator control.

Smartcard ribbon gauge (fax)

Smartcard ribbon gauge supplied with each ribbon. Allows you to monitor ribbon usage.

Smart redial

Remembers the pauses between numbers you dial. This is useful for calling home banking or automated services.

Talktime/standby

Handsets switch to standby mode when not in use and therefore do not need to be recharged as frequently.

Time saver

Saves time when remotely accessing your answering machine.

Two-way handset charging

Allows you to charge the handset either facing down or facing up on the base.

Two-way record

Allows you to record telephone conversations as they happen.

VIP feature

Allows designated callers to beep you if the Response 85 is in the 'answer' mode. If you do not answer the caller can still leave a message.
